

Schöck Isokorb® type 0

Alignment of elements/cross-sections/perm. section forces

Dimensions

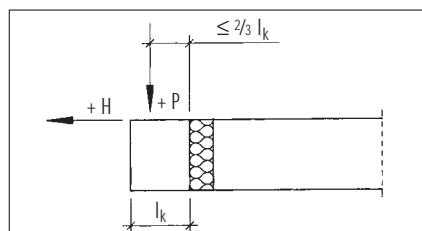

Height of element	18 - 25 cm
Length of element	35 cm
Insulation material thickness	6 cm

Reinforcement

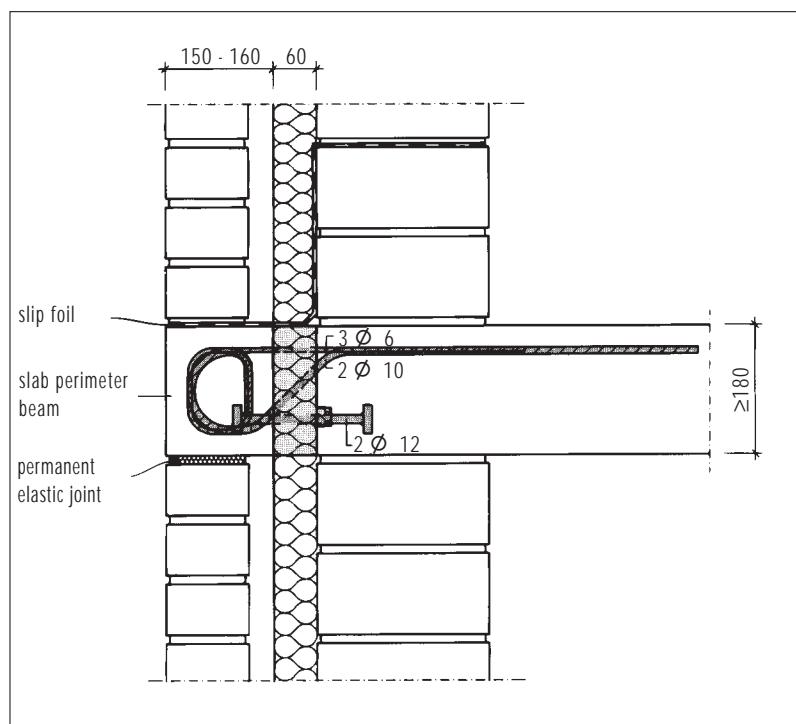

Tensile rods	3 Ø 6 mm
Thrust bearing	2 Ø 12 mm
Shear force rods	2 Ø 10 mm

Perm. section forces

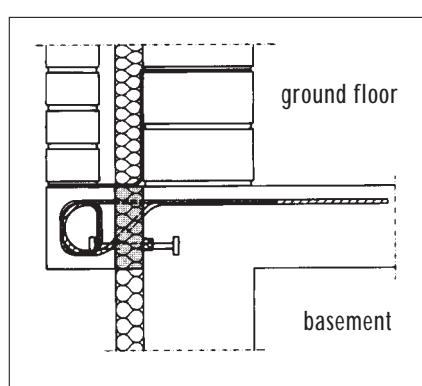

perm. P = $(38,5 - H) \times 9,7/25,17$
max. H = 13,5 kN/Element
for H = 0 → perm. P = 14,84 kN/Element

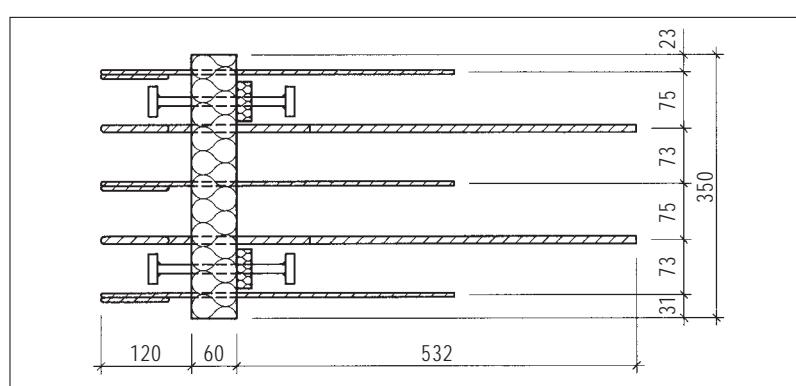

Static system

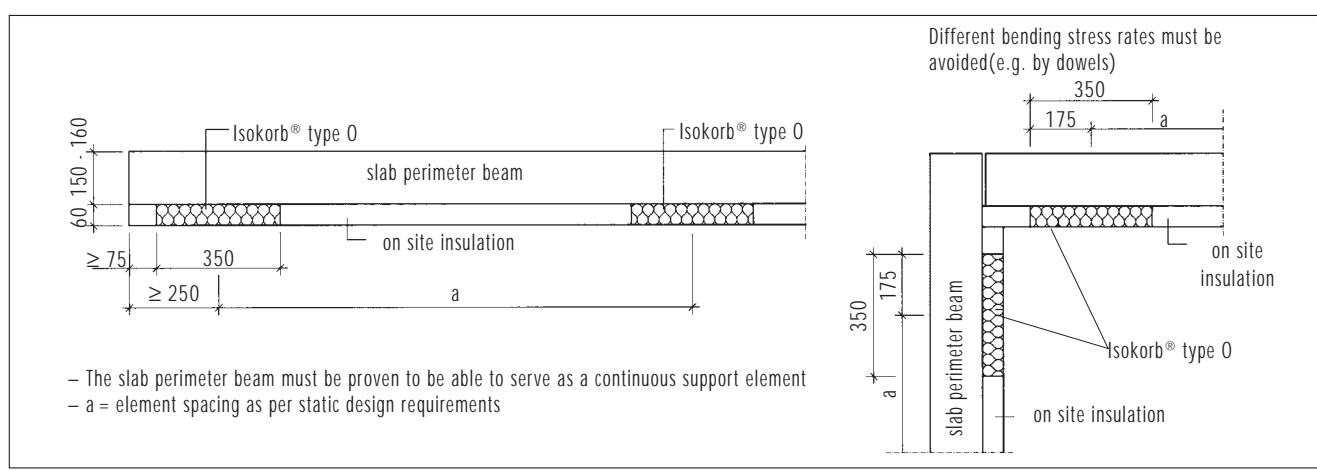

Cross-section slab corbel

Cross-section slab corbel at basement wall
